

Initial set up

A home page is configured with the different processes that each participant will use.

The signatures that have previously been sent are established to automate the consent signing process.

Create a form for each staff member involved

Nurse

Technologist

Radiologist

Administrator

Patient

The patient arrives at the clinic

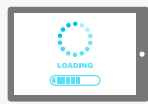

Validate the procedure that will be carried out

A nurse is assigned to start the process

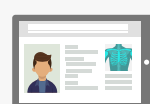

Nurse

Access the platform

Choose the procedure

Diligence the data

The patient considers the options

Share the associated risks

Validate the information

Radiologist

Enter and view the consent

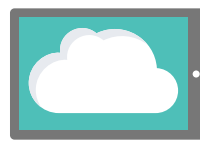

Sign and close the document

Digital notarization

A PDF is generated

It is stored in the cloud

Patient

Reading of consent

Approval

Patient's signature

Continue with the process

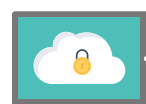

Denial

Patient's signature

Digital notarization

It is stored in the cloud

The case is closed

Technologist

Take consent

Validate the information
